

The figure consists of two vertically stacked line charts sharing a common x-axis labeled 'Month' with ticks for Jan, Feb, Mar, Apr, May, Jun, Jul, Aug, Sep, Oct, Nov, and Dec.

The top chart is titled 'Log Return'. It displays multiple data series as lines of varying shades of blue and orange. The lines fluctuate significantly throughout the year, with several sharp peaks and troughs. The overall trend appears relatively flat, with most values clustered between -0.05 and 0.05.

The bottom chart is titled 'R_a'. It displays multiple data series as lines of varying shades of blue and orange. The lines show more pronounced volatility than in the 'Log Return' chart, with several sharp peaks and troughs. The overall trend is slightly upward, with values ranging from approximately -0.05 to 0.05.
